PROFILE

To design and develop modern, responsive, and user-centric websites that deliver seamless user experiences across all devices. Passionate about leveraging the latest web technologies and industry best practices to create scalable, high-performance web applications that align with client objectives and contribute to business growth. Committed to continuous learning and innovation to stay ahead in the ever-evolving field of web development.

PROJECTS

Styles - E-commerce - React

Built a full-stack e-commerce website using the React, featuring user registration/login, product browsing, shopping cart functionality, and basic order tracking.

AgriAura - E-Commerce - MERN Stack

Agriaura is being created using the MERN stack to streamline shopping operations by enabling online fruits and vegetables shopping. Users will be able to order vegetables and fruits online with an easy payment process and specific order tracking ability. It is a real-time project with a user-friendly web interface and is currently under active development.
